

Figure 1. The effect of the number of trials on the mean RTs (M) and SDs ($s.d.$) of the RT distribution. The left panel shows the mean RTs and the right panel shows the SDs. The x-axis represents the number of trials (10, 20, 30, 40, 50) and the y-axis represents time in milliseconds (ms). The legend indicates two conditions: No feedback (open circles) and Feedback (filled circles).
